ATTACHMENT NO. 1

SCOPE OF DESIGN SERVICES

VILAS PARK BRIDGE REPLACEMENT PROJECT

RFP# 8608-0-2017-MS

In this Attachment No. 1; the word “City” means City of Madison, Wisconsin. The word “Consultant” means the licensed engineering design professional and the word “Project” shall mean the VILAS PARK BRIDGE REPLACEMENT PROJECT.

Section 1: SCOPE OF DESIGN SERVICES

1.1. Project Summary

The overall project scope consists of replacing two existing timber-framed bridges in Vilas Park with two new, multi-use bridges. The existing bridges span a shallow lagoon and serve as the primary north-south pedestrian connection in the park. The bridges also connect a small island located in the center of the lagoon to the greater surrounding park. The north bridge has a span of approx. 73 ft. with an average clearance width of 7.5 ft. The south bridge has a span of approx. 100 ft with an average clearance width of 7.5 ft. Both bridges have timber end walls and stone block gravity abutments.

The existing bridges are rustic in character and located in a scenic location of the park. One of the project's primary challenges is to provide new bridge designs that are in-keeping with the overall park aesthetic while meeting the load and durability standards necessary for park operations. See attached project location plan and existing bridge images for reference.

The overall project will be let by the City of Madison using local funds. Plans, special provisions and estimates prepared by the Consultant will be inserted into the bidding documents prepared by City staff. Construction is anticipated to occur during the latter half of 2017 and into early 2018.

1.2. General Description of Consultant Scope

The Consultant shall provide structural analysis, schematic options, schematic cost estimates, construction plans and details, construction Special Provisions and a final estimate of probable cost for two pre-fabricated bridges and their associated abutments. The Consultant shall also provide bidding, shop drawing review and construction observation services as defined in this Scope of Services.

1.3. Project Coordination

The Consultant will attend periodic coordination and design review meetings with the City over the course of the project. It is anticipated this will include one (1) kick-off meeting, up to two (2) progress meetings, one (1) pre-final design review meeting and one (1) pre-construction meeting.

The Consultant will be expected to generally remain in close coordination with the City via periodic phone or emails throughout the project.

1.4. Field Survey, Right of Way and Utilities

Survey data collection has been completed by the City of Madison. The City will supply the survey data to Consultant as a CADD topographic base map and digital terrain data. The City's current design software is InRoads / Microstation V8i (Select Series).

Existing utilities are shown on the City's topographic mapping based on field locates. The Consultant shall alert the City of any identified discrepancies or omissions and shall identify any suspected conflicts with the proposed structures. The City will conduct the necessary coordination with utilities for any necessary relocations.

The bridges are located within City-owned property. The bridge abutments may require special design considerations to avoid encroaching on adjacent trees on the lagoon shore.

1.5. Soil Borings

Soil borings and subsurface investigation is being completed by CGC, Inc. for the City. This consists of one deep boring for each abutment location, with typical soil analysis parameters needed for the structure design. The results of the geotechnical investigation will be provided to the Consultant prior to the project kick-off date.

1.6. Schematic Design

The load capacity for both bridges has not been determined. The Consultant shall prepare two (2) schematic bridge options for each site that address the following load criteria: The first option shall accommodate all vehicles used by City maintenance operations as identified below. The second option shall accommodate all vehicles excluding the tandem axle dump truck. Both options shall include schematic cost estimates and identify any structural modifications necessary to meet the load requirements. The City will determine the final capacity for each bridge based on the schematic cost estimates and structural design modifications.

The estimated Parks Division vehicle weights include:

- John Deere 1435 mower - 2,560 lbs
- Jeep with plow – 4,560 lbs
- Toolcat with bucket – 5,980 lbs
- Tiger flail mower – 14,560 lbs
- One ton dump truck – 17,560 lbs
- Clam truck - 28,000 lbs
- Tandem axle dump truck - 50,000 lbs

1.7. Design Development

The City anticipates holding two (2) public input meetings for this project. The Consultant shall provide a minimum of (2) schematic design alternatives for each bridge location for consideration during the public review process. The alternatives shall address the aesthetic treatment of each bridge, considering wingwall layout, architectural surface treatment and railing design. Alternatives shall be presented in schematic form as plans, elevations and perspective renderings. The Consultant shall provide schematic cost estimates for each design alternative to aid the City decision making process.

The Consultant shall also provide an analysis of the anticipated sound levels at the Henry Vilas Zoo and surrounding residential neighborhood from pile driving operations. The Consultant shall identify any potential noise attenuation measures and provide an estimate of their associated costs.

The Consultant will not be required to attend the public input meetings.

1.8. Design and Plans for Bridge

Upon the final selection of the bridge options, the Consultant shall provide final construction plans, details, Special Provisions, quantities and cost estimate for the new structures. Work includes detailed plans for foundations, abutments, C.I.P. wingwalls, approach slabs and railings; and overall dimensions, aesthetic requirements and performance specifications for the pre-fabricated structure.

- a. New piling support is anticipated for the new abutments. The Consultant shall review the condition of the existing wood piles and determine if they can be supplemented with new steel piles to minimize site disturbance. The Consultant shall also determine if screw-type piles are an option and provide a cost estimate for their use.

- b. It is anticipated the existing stone retaining walls for the path approaches will need to be preserved. The Consultant shall design the new concrete abutments to minimize disturbance to the existing stone work as much as possible.
- c. Substructure plans shall consist of all sheets required to detail cast-in-place footings or pile cap, abutments, wing walls, and concrete approach slabs.
- d. It is anticipated that short segments of railing will be required beyond the ends of the pre-fabricated superstructure at all four corners. The Consultant shall design and detail the railings in accordance with general guidelines provided by the City.
- e. The bridge deck will be cast-in-place concrete. The top of top chord or a separate railing extending the full length of the bridge shall be a minimum of 48 inches above the deck.
- f. Clear width on the bridge shall be 12 feet and the span of the north bridge is estimated to be approximately 73 feet. The span of the south bridge is estimated to be approximately 100 feet.
- g. The outside face of the abutments and wingwalls will require architectural surface treatment most likely achieved by form liner and/or concrete staining.
- h. The original stamped and signed plan sheets will be provided to the City for insertion in the final plans. City will provide the Consultant with sample plan sheet borders.
- i. Consultant shall provide any contract Special Provisions needed for the bridge foundation, substructure units, superstructure, approach slabs, railings, coatings and architectural surface treatment in MSWord. City will reformat these as necessary and insert them in the final bidding documents. The contract will be based on City of Madison Standard Specifications. However, the structure provisions may make reference to the State of Wisconsin Standard Specifications as needed.
- j. Consultant shall provide estimated quantities for footings and/or pilings, concrete, steel and other items associated with the structures, to be shown on the plans. However, Measurement and Payment provisions may be based on a lump sum for the complete bridge structures.

Consultant shall provide an estimate of probable cost for the structure broken down into estimated quantities and unit costs for the various components.

1.9. Project Permitting

The Consultant shall identify all required permits for the project's construction and provide a permit submittal schedule for City review. The Consultant will prepare and provide all necessary permitting materials to the City for submittal to the identified reviewing agencies.

1.10. Shop Drawing Review

It is anticipated that the bridge superstructures will be pre-fabricated trusses designed by the bridge supplier. The Consultant shall review shop drawings from the suppliers for conformance with the geometric and loading requirements and general design intent represented in the Consultant's final plans and Special Provisions.

1.11. Construction Phase

The Consultant shall provide construction administration and oversight services during the construction phase of the project.

The Consultant shall conduct construction progress meetings and shall prepare minutes of the meetings. Such meetings shall be held at regular intervals (bi-weekly minimum) and as required by City. The Consultant shall also make periodic visits to the site at least once per week and more often as necessary to maintain familiarity with the progress and quality of the work and to determine in general if the work is proceeding in accordance with the contract documents.

The Consultant will inspect field installation of critical design features and elements were installed as intended per design.

The Consultant shall also perform construction supervision specifically required by the State (including but not limited to Division of Safety and Professional Services, DNR, etc.). Address questions from the contractor as directed by the City.

The Consultant shall perform a site walk through and submit a punch list of items that need to be corrected by the Contractor prior to the completion of the project.

At the end of the project the Consultant will prepare electronic as-built drawings based on field observations and Contractor's markup.

Order of Precedence: If there is a conflict between this Section A and any terms in the vendor's accepted bid or proposal, this Section A shall control unless the parties expressly agree to another order of precedence, in writing. If there is a conflict between this Section A and a Separate Contract, the terms and conditions of the Separate Contract shall control.
- I. **TERMS FOR SUBMISSION OF BIDS: The following section applies to the bid/selection process only.**
3. This invitation for bids does not commit the City to award a contract, pay any costs incurred in preparation of bids, or to procure or contract for services or equipment. The bidder shall be responsible for all costs incurred as part of his or her participation in the pre-award process.
The City reserves the right to accept or reject any or all bids submitted, in whole or in part, and to waive any informalities or technicalities which at the City's discretion are determined to be in the best interests of the City.
