2 DESCRIPTION OF SERVICES/COMMODITIES

2.1 General Information

The commissioning services are for six (6) facility projects located in Madison, WI that are pursuing LEEDv4 certification. Therefore professional commissioning services for the design and construction of the buildings are required. In addition as defined by LEEDv4, enhanced commissioning and energy modeling services are being included for these projects. The six buildings are:

1. Door Creek Park Shelter (new construction) – *Construction and Warranty Phases Only*,
2. City County Building Floor 1 Remodel (commercial interiors) – *Construction and Warranty Phases Only*,
3. Warner Park Community Recreation Center Addition (new construction),
4. Lake Street Garage Redevelopment (Parksmart),
5. Metro Maintenance Facility – Phase 3B (new construction), and
6. Metro Hanson Road Facility (new construction)

Building descriptions and general scope of work are included later in this document.

The following Exhibits also describe each project:

- A. Attachment A – Door Creek Park Shelter
- B. Attachment B – City County Building Floor 1 Remodel
- C. Attachment C – Warner Park Community Recreation Center Addition
- D. Attachment D - Lake Street Garage Redevelopment
- E. Attachment E – Metro Maintenance Facility – Phase 3B
- F. Attachment F – Metro Hanson Road Facility

Please note that firms selected for A/E services for one of these projects will not be considered for commissioning services on that project and vice-versa. The firm would not be excluded from submitting on the other projects (either as an A/E or commissioning consultant) and will not be penalized for only submitting on some of the projects; however this should be stated in the proposal. For example if ABC Engineering is the selected design MEP firm for Door Creek Park Shelter, they will not be considered for the Cx consultant for Door Creek Park Shelter, but would be considered for the other projects. The A/E teams have already been selected for each of these projects.

The selection process may result in up to three (3) consultants being selected for some combination of these six (6) projects. The winning consultant(s) and personnel assigned to these projects need to be licensed to perform engineering work in the State of Wisconsin and also have experience commissioning at least two (2) similar past projects for each of the six projects, or for however many are being proposed. In addition, schedules for these projects may overlap therefore the winning consultant(s) need to demonstrate ability and capacity to perform commissioning and energy modeling work on more than one of these projects simultaneously.

2.2 Consultant Scope Definition

The projects include commissioning, enhanced commissioning, and energy modeling services. These services will include documenting Owner's requirements, developing a commissioning plan, review of design submittals, O&M manual review, systems manuals, training, operations and warranty review, commissioning reports, and similar items. The scope of these projects includes energy modeling and simulation engineering services, and ongoing commissioning services after completion of construction.

Commissioning, enhanced commissioning and energy modeling services shall meet the requirements of USGBC LEEDv4 design and construction criteria.

Systems to be commissioned shall include:

- The entire HVAC system including geothermal, boilers, chillers, pumps, piping, and air distribution, and similar items.
- The building automation system for the HVAC system.
- The plumbing system including domestic hot water.
- The electrical systems including lighting fixtures and lighting controls.
- Renewable energy systems potentially including solar hot water heating and photovoltaic (PV) electrical power generation systems (if applicable).
- The building envelope and roofing systems.
- The emergency power generation system (if applicable).

The commissioning services shall ensure that building systems are designed, installed, functionally tested and capable of being operated and maintained to perform within the building design intent.

The Commissioning Authority shall provide supporting services for building improvements that will achieve LEED Certification-Silver following the U.S. Green Building Council's LEED BD+C: New Construction (LEED-NCv4) or LEED ID+C: Commercial Interiors (LEED-CIv4) Rating System (for a copy of the LEED-NC Rating System go to www.usgbc.org and click on LEED). The environmental sensitivity and high performance characteristics are part of the project objectives. The City is particularly interested in sustainable technologies that address waste reduction, energy efficiency, water efficiency, storm water management, materials and resources, indoor environmental quality, operations, and maintenance. All five of these projects have been or will be registered under LEEDv4.

A detailed scope of work follows this section. Consultants will be expected to perform the following, general services for each project:

2. Assist the City with initial development of the Owner’s Project Requirements. Assist the City with keeping the OPR up to date as the design progresses. The OPR is to include requirements for the exterior enclosure of the building.
3. Develop an energy simulation model of the building and provide simulations of different massing, assemblies and system options, including simple payback analysis. No LEED Baseline modeling is required at this phase. Assume that up to 10 features of the building will be modeled (such as insulation, window properties and placement, lighting targets or HVAC systems). Relative cost savings between the options will be considered; accuracy related to absolute savings should not be a key focus. The first costs for various options will be provided by either the City or the architectural and engineering consultants.
4. Review building design against ASHRAE 90.1-2013 Section 4.2.1.1 mandatory provisions. Assist the team with understanding how the mandatory provisions are to be incorporated into the project and what their impacts are likely to be.
5. Attend a Schematic Design Charrette Meeting, organized by the Architect, to develop clear and quantitative sustainability goals that; optimize energy efficiency, promote occupant productivity and health, and promote resource conservation and environmental responsibility. The charrette will be attended by the Architect and various disciplines of the design firm and its consultants. The sustainable design goal setting session shall be used to develop consensus of the strategies and technologies to be explored during design. The Architect will use COTE Top 10 as a goal setting tool. LEED Scorecards will not be developed at this point.
6. Review the schematic design documents, including the exterior enclosure, and provide comments.
7. The Commissioning Authority shall not proceed beyond Phase II without written authorization from the City’s Designated Representative.

2.4.3 PHASE III: DESIGN DEVELOPMENT PHASE (DD)

1. Review all predesign, schematic design, and design development information provided by the City.
2. Perform focused reviews of the Architect's drawings and specifications.

The phrases "request for proposal," "invitation for bids," "request," "invitation," and "solicitation" shall also be synonymous.
As applied to the winning or selected bidder, the words "bid," "proposal," and "contract" are synonymous.
 2. **Entire Agreement, Order of Precedence.** These standard terms and conditions shall apply to any Purchase Order issued as a result of this Request for Bid/Proposal, except where expressly stated otherwise in the RFP or in a written instrument covering this purchase signed by an authorized representative of the City and the Contractor, in a form approved by the City Attorney (a "Separate Contract"). If such a separate contract is executed it shall constitute the entire agreement and no other terms and conditions, whether oral or written, shall be effective or binding unless expressly agreed to in writing by the City.
If a Separate Contract is not executed, these Standard Terms and Conditions, the City's request for proposals, the version of the vendor's bid that was accepted by the City, and the City's Purchase Order (if any) shall constitute a contract and will be the entire agreement.
Order of Precedence: If there is a conflict between this Section A and any terms in the vendor's accepted bid or proposal, this Section A shall control unless the parties expressly agree to another order of precedence, in writing. If there is a conflict between this Section A and a Separate Contract, the terms and conditions of the Separate Contract shall control.
- I. TERMS FOR SUBMISSION OF BIDS: The following section applies to the bid/selection process only.**
3. This invitation for bids does not commit the City to award a contract, pay any costs incurred in preparation of bids, or to procure or contract for services or equipment. The City may require the bidder to participate in negotiation and to submit such additional price or technical or other revisions to his or her bids as may result from negotiation. The bidder shall be responsible for all costs incurred as part of his or her participation in the pre-award process.
The City reserves the right to accept or reject any or all bids submitted, in whole or in part, and to waive any informalities or technicalities which at the City's discretion are determined to be in the best interests of the City. Further, the City makes no representations that a contract will be awarded to any offeror responding to this request. The City expressly reserves the right to reject any and all bids responding to this invitation without indicating any reasons for such rejections(s).
The City reserves the right to postpone due dates and openings for its own convenience and to withdraw this solicitation at any time without prior notice.
 4. **Addenda.** Changes affecting the specifications will be made by addenda. Changes may include, or result in, a postponement in the bid due date. Bidders are required to complete the Bidder Response Sheet, acknowledging receipt of all parts of the bid, including all addenda.
 5. **Price Proposal.** All bidders are required to identify the proposed manufacturer and model, and to indicate the proposed delivery time on the attached Proposal Form. Failure to do so may cause the bid to be considered not responsive. If desired, the bidder may include product literature and specifications. The price quoted will remain firm throughout each contract period. Any price increase proposed shall be submitted sixty (60) calendar days prior to subsequent contract periods and shall be limited to fully documented cost increases to the bidder which are demonstrated to be industry-wide.
 6. **Price Inclusion.** The price quoted in any bid shall include all items of labor, materials, tools, equipment, and other costs necessary to fully complete the furnishing and delivery of equipment or services pursuant to the specifications attached thereof. Any items omitted from the specifications which are clearly necessary for the completion of the project shall be considered a portion of the specifications although not directly specified or called for in these specifications.
 7. **Pricing and Discount.**
 - a. Unit prices shown on the bid/proposal or contract shall be the price per unit of sale (e.g., gal., cs., doz., ea., etc.) as stated on the bid/proposal or contract. For any given item, the quantity multiplied by the unit price shall establish the extended price. If an apparent mistake exists in the extended price, the unit price shall govern in the bid/proposal evaluation and contract administration.
 - b. In determination of award, discounts for early payment will only be considered when all other conditions are equal. Early payment is defined as payment within fifteen (15) days providing the discount terms are deemed favorable. All payment terms must allow the option of Net 30.
