-10% off all other accessories (excluding smart watches and Apple products)

Static IP Addresses
USCC waives set-up fee for Static IP for State of WI

Private Core and APN
US Cellular supports the industry standard, customized private APN by utilizing a VPN solution that entails a GRE over IPSEC tunnel.
Set up for this solution is fully customizable to the preferences to the State of Wisconsin. US Cellular also supports the ability for an entity to maintain the data on premise through a Pgateway if that is of interest to the State of Wisconsin.
US Cellular provides this at no additional cost for our government and critical first responder customers.
